

PROTECTION CAPSULE

SHOCK / QUAKE VERSION 1 (Q-01) **COMING SOON**

Reinforced Capsule for Earthquakes and heavy shocks

RESISTANCE
500kg impact

QUAKE RADAR

COMPACT AND EASY SHELTER

DEBRIS RESISTANCE

MAIN TECHNICAL CHARACTERISTICS

✓ MODULAR INSTALLATION

Structure can be disassembled for easy installation on different floors

⚖️ OPTIMIZED WEIGHT

Maximum weight of 500 kg

⚠️ STANDARDS COMPLIANCE

Complies with modern construction standards (resistance between 250 and 450 kg/m²)

DEVELOPMENT AGENDA

FROM JUNE 2026

ENGINEERING & DEVELOPMENTS

Structural analysis, material selection, prototype iterations.

END OF 2026

TESTS & CERTIFICATIONS

Crush resistance, impact testing, official compliance validation.

EARLY 2027

MARKET AVAILABILITY

Launch to public sector & private pre-orders

LOGISTICS & TRANSPORT

Lifepods can be easily and rapidly deployed and comply with these transport modes
